(2) Financial subsidies for air cargo development in Hainan Province

In order to promote the development of air cargo and support the construction of Hainan Free Trade Port, the People's Government of Hainan Province has decided to establish a financial subsidy fund for air cargo development.

① Subsidies based on domestic all-cargo routes and flights	
For aircraft models with a maximum payload capacity of ≥50 tons	For round-trip flights with a total duration of 4 hours or less, the subsidy is 48,000 yuan per flight. For round-trip flights with a total duration of over 4 hours, the subsidy is 72,000 yuan per flight.
For aircraft models with a maximum payload capacity of ≥10 tons and <50 tons	For round-trip flights with a total duration of 4 hours or less, the subsidy is 24,000 yuan per flight. For round-trip flights with a total duration of over 4 hours, the subsidy is 36,000 yuan per flight.
② Subsidies based on international all-cargo routes and flights	
For aircraft models with a	For round-trip flights with a total duration of 4 hours

maximum payload capacity of ≥ 100 tons	or less, the subsidy is 150,000 yuan per flight. For round-trip flights with a total duration of over 4 hours, the subsidy increases by 32,000 yuan per flight for each additional hour of duration.
For aircraft models with a maximum payload capacity of ≥ 50 tons and < 100 tons	For round-trip flights with a total duration of 4 hours or less, the subsidy is 120,000 yuan per flight. For round-trip flights with a total duration of over 4 hours, the subsidy increases by 30,000 yuan per flight for each additional hour of duration.
For aircraft models with a maximum payload capacity of ≥ 10 tons and < 50 tons	For round-trip flights with a total duration of 4 hours or less, the subsidy is 60,000 yuan per flight. For round-trip flights with a total duration of over 4 hours, the subsidy increases by 15,000 yuan per flight for each additional hour of duration.
③ For flights with an execution rate $> 80\%$, the flight subsidy is calculated according to the subsidy rate. For flights with an execution rate of > 50 and $\leq 80\%$, the flight subsidy is calculated by multiplying the subsidy rate by the actual execution rate. Flights with an execution rate $\leq 50\%$ will not receive any subsidy.	
④ Flights on routes with zero inbound and outbound cargo volume at both ends, as well as flights using aircraft models with a maximum capacity of < 10 tons or less, will not be included in the calculation of subsidies for all-cargo flights.
